Commentary

It is with pleasure that we present our results for the six month period ended 31 December 2007. A pleasing growth in both operating profit and basic headline earnings per share of 32% and 33% respectively, was achieved as a result of increased revenues and improved cost controls in the period under review. Growth has been entirely organic and achieved due to our successful annuity income model. Once again our cash generation by trading operations has been a highlight, increasing by 25% against the comparable period.

Prospects

We expect continued revenue growth as a result of increased customers volumes, more systems being installed by our existing customers, and new customers being signed up. Revenue growth can also be expected as a result of the rollout of new products. Marginal expense curtailment will continue supported by continued cash generation.

Basis of preparation

The condensed financial statements have been prepared in accordance with the recognition and measurement requirements of International Financial Reporting Standards and the presentation and disclosure requirements of IAS 34. The accounting policies applied are consistent with those reflected in the financial statements for the year ended 30 June 2007.

Related party transactions

The Group has entered into various transactions with related parties on an arm's length basis and at market rates.

Distributions to shareholders

Compu-Clearing has a policy of paying a single dividend or distribution at year end. As a result, the company has not declared an interim dividend and/or distribution to shareholders. A capital distribution of 12 cents per share (2006 – dividend of 11 cents per share and a capital distribution of 9 cents per share) was paid to shareholders during the period.
